Why take a lesson?

To putt and chip light years ahead of your present ability (60% of your strokes are within 100 feet of the hole)

To know why your ball goes where and what to do about it. If you think an Outside-In swing causes a slice you need at least one lesson!

To hit the ball farther than you ever thought possible (Tal can do this with one hand and it isn't the hand you think!)

To have more fun playing golf!  
Isn't this the goal with your game?

## Teaching Theory

**Putting** - the three "D's" - decision, direction and distance. Do ONLY one of these at a time and you will become a better putter. Much Better!

**The Swing** - is divided into two distinct parts: the pre swing and the inswing—90% of golfers do this backward and will never reach their potential!. The other 10% win most of their weekly games!

**Alignment** - how you can get aligned to your target as well as every tour pro. Why you can *never* get aligned without two simple secrets!

**Bunkers**— how five lines will transform you to the "King of the Beach"!

**Why**— lessons have never worked for you and what as a team we will do to make the difference in your learning curve.
